

## Jetronix-Eco PC Suite Update

The Jetronix-PC Suite® is a simple software that allows the user to fully control the Jetronix-Eco station through a few easy clicks.

Please make sure that you are always updated and that you are using the latest Software, Firmware and Driver versions of the Jetronix-Eco Station for the best performance, stability and for your own comfort.

The latest updates are:

Software Version: 1.07

Firmware Version: 1.06

Driver Version: 3.3

The updates include the following points:

- Enhancing the USB driver connectivity for a more stable faster and reliable connection.
- Modifying the run Fan and run Pump features while running the process.
- Modifying the heaters' behavior during the cooling stage.
- Adjusting the firmware and software versions that appear on screen to be compatible with actual used versions.
- Fixing the Arabic language interface bugs.
- Adjusting the dwell time period to be actually the same as process input values.
- Fixing minor bugs.
